

## BLADE HANDLE

Package: 1Pcs/Box

## ASSEMBLY INSTRUCTIONS

1 Screw into blade base

Squeeze case tightly here

2

For straight type handles

For bayonet-type handles

Angle adjusting screw

## COMPANY PROFILE

Founded in 2009, Beijing Bohaikangyuan Medical Devices Co., Ltd. is identified as a National high-tech enterprise and Zhongguancun high-tech enterprise. Focusing on microsurgical instruments' innovative research and development, we provide overall solutions for microsurgery, super-precision microsurgery, and peripheral vascular interventional surgery.

Located in Beijing Tongzhou Science Park, our two modern research and production bases covers total of 4000m<sup>2</sup>. With excellent scientific and technical personnel and R&D team, our company has obtained ISO13485, EN:ISO13485, CFDA, CE, IPMS, dozens of patent authorizations, 3 Beijing new technology certificates and other awards issued by the state and the municipal government.

Our product line covers orthopedics, neurosurgery, microsurgery, cardiovascular surgery, ophthalmology, otolaryngology, plastics, and other fields. Our products are widely used in over a thousand hospitals in China and highly praised by users and agents.

In the future, we will continue to take "Innovation for Life" as our mission and dedicate to be a global provider of precision surgical instruments in the field of microsurgery. Expand the Bohaikangyuan medical platform with a professional service concept, carry forward the Bohaikangyuan medical spirit, and strive for the health of humankind!

# DISPOSABLE PRECISION CUTTING TOOL

## SPECIAL MICROSURGICAL SCALPEL

## R&D BACKGROUND

With the development of microsurgery technology, the existing surgical instruments are far from meeting the innovative needs of clinical experts in surgical technology. In particular, there are hardly any disposable special micro scalpels for cutting, puncturing, hooking up, picking up, pushing and stripping etc for different procedures, operative sites and tissues. Beijing Bohaikangyuan Medical, the industry leader of micro scalpel in China, the micro-grinding technology industry base, has cooperated with clinical experts to develop "micro scalpel series" which have been highly recognized and praised. The development and production of micro scalpel is an upgrade to the conventional surgical scalpel industry. It is a comprehensive innovation of products, technology and materials and a result of technological linkage and development of multi-industries.

## PRODUCT DESCRIPTION

### DT-Z-352 Dura Blade

Package: 5Pcs/Box

This blade is specially designed for dura mater. Its curved and blunt guard protects the underneath tissues during incision of dura mater or spinal dura mater.

### DT-Z-353 Dura Blade

Package: 5Pcs/Box

### DT-Z-354 Arachnoid Blade

Package: 5Pcs/Box

This Blade is designed for arachnoid blade. The 0.3mm depth-limit design on the edge of circular blade prevents damage to deeper tissue. The 2.0mm wide edge reveals excellent view of the incision.

### DT-Z-356 Straight Blade

Package: 5Pcs/Box

The ultra sharp 25° blade is for micro-incision.

### DT-Z-357 Curved Blade

Package: 5Pcs/Box

The ultra sharp curved blade is for micro-incision.

### DT-Z-358 L-Hook Blade

Package: 5Pcs/Box

The ultra sharp hook-shaped blade is for micro-incision.
